

## Greenford Christian Church New Gathering & Worship Facility Greenford, Ohio

The proposed Greenford Christian Church - Gathering & Worship Facility is a multi-phased project that is planned for long-term expansion as the size and needs of the congregation develop over time. The initial Worship Space phase provides seating for over 600 people and incorporates state-of-the-art sound and A/V systems. The Gathering Space phase provides a social environment with areas and rooms for casual seating, ushers, bride's room, nurse, restrooms and cry room. The final Education Space phase will provide classroom & ancillary facilities for the congregation. The initial fundraising goals were not reached for this original design concept, so an alternate concept was developed utilizing a pre-engineered structure as the main building shell, with architectural elements & details added to enhance the aesthetics of the facility.
